

Kent and a Non-Voter

How do I sign up?

Roughly half the people who could vote do not do so. The potential to affect political change is enormous in this country. When you register to vote Green you send a powerful message that you want real change. Working together, we can improve politics and improve our basic physical security by developing a more trust-worthy government and more accurate representation. Registering is powerful.

Then, use the subject line "I WANT CHANGE" and write to delegation@mesplay.org as soon as possible, including:

- Your full name as registered to vote
- Your County and State of Residence

Pass www.mesplay.org around

At the 2004 Presidential Nominating Convention Kent Mesplay gained delegates in the second round of voting and was "runner up" to Ralph Nader.

The Platform You Would Be Supporting

Sustainability is Security, through local economies, renewable energy, L.E.E.D. architecture, preparing for Global Warming.

Reform Politics through Instant Runoff Voting, require real debates between all political parties, ban lobbying and its corrupting influence.

Peace, not just by ending the war in Iraq but by encouraging and promoting sustainable living through green economies elsewhere.

Treaty/Sovereignty Rights and political representation for tribal peoples, especially elders and traditionalists (Mesplay's background is Blackfoot).

Be the Change you
want in Politics.
Register Green and
vote Mesplay. It's not
"spoiling," it's Voting.

What's this about?

Greens have long been advocates of justice and environmental protection. We work to change politics so that voting machines are secure, so that the Electoral College is replaced with Direct Popular Election, so that the money is taken out of politics through Public Campaign Financing and Equal Media Access and Debate Inclusion for Alternative candidates. Mesplay has long been sounding the warning about Climate Change. He works as an Air Quality Inspector and is a Ph.D. in Engineering.
